

Hylec-APL – Making the Right Connections

Hylec-APL is an ISO 9001:2008 accredited company, and a leading component distribution specialist, focussing on the specification and bulk supply of terminal blocks, connectors, cable glands and other electrical and electronic components to the UK market. Supplying many of the major UK OEMs, sub-contract manufacturers (EMS) and leading distribution organisations, quality and delivery is guaranteed.

Hylec products are used in applications covering a range of industry sectors including: domestic appliances, fire and security, lighting, HVAC, renewable energy, outdoor power distribution, offshore and marine. Hylec-APL can provide a wide range of product options and application solutions including access to many thousands of line items from its extensive and largely exclusive supplier base.

A large UK stock profile is maintained at the company's Northamptonshire base, which is geared to reflect popular market demand whilst offering enhanced product availability to customers. Product customisation is available to order with options including buffer stocking and special packaging requirements.

With an ever developing product range Hylec-APL works hard to ensure that it can deliver a service that continues to exceed customer expectations. It has recently extended its range to include DIN Rail mounting PCB enclosures, a range of weatherproof cable connectors, small and simple SMT IDC/IPC crimp connectors and now includes "X-Synergy" a high quality RJ-45 Ethernet connection system which is suitable for the latest Cat 6A and fibre optic data transmission systems.

Hylec-APL prides itself on its communication with customers; its Sales Managers are always available to visit customers to discuss projects and applications. With a wide product knowledge they can work with customers to develop individual and fully bespoke solutions.

All of Hylec's products hold recognised Industrial Safety Approvals and these, together with samples, can be supplied on request. Delivering value for money and consistently supplying the highest possible quality products and services is Hylec's priority.
