ABOUT US

Hylec-APL is a well established Component Distributor specialising in the bulk supply of Terminal Blocks, Connectors and Cable Glands to major OEM's, Sub-Contractor Manufacturers and leading Distribution organisations into both the Electromechanical and the Electronics sectors.

Hylec APL can provide a wide range of product options and application solutions including access to many thousands of line items from its extensive and largely exclusive supplier base. Hylec APL maintains a large UK stock profile at its base in Northants, which is geared to reflect popular market demand whilst offering enhanced product availability to its many customers.

In addition to its core product lines of Terminal Blocks and Connectors – both Electromechanical and Electronic variants - Cable Glands and Cable entry components, Hylec APL has recently extended its range to include LED's, Switches, Buzzers, Relays, Fuses and DIN Rail Mounting Enclosures. This evolutionary development is designed to not only widen market appeal but also to provide the customer with greater choice, the potential for supplier consolidation and the commercial benefits of economies of scale.

Subject to availability, delivery methods include next day carrier as standard and customer specific options, such as special packaging requirements, can be readily considered.

Product choice is supported by a wealth of product knowledge and application experience, and our technical sales team will be only too pleased to assist in the process of correct product selection.

The vast majority of products hold recognised Industrial Safety Approvals and these together with samples can be supplied upon request.

Value for money consistent with the supply of the highest possible quality of products and service is our number one priority.
