5X3 POLE 32 AMP CONNECTORS

SAVES TIME & MONEY

Debox SL2 can be installed in less than a couple of minutes – saving you time & money on every installation without compromising quality. Debox SL2 saves professional electrical contractors valuable time and makes installation easier for smaller and larger internal wiring jobs, as everything needed is supplied with the box and there is no need to use a screwdriver to securely join wires.

100% TOOL-LESS BOX ASSEMBLY

Debox SL2 is here to make your life easier. Thanks to its design, Debox SL2 ends the frustration of dropping tiny screws on the floor, which then have to be retrieved, or not having required components on hand. No tools. No screws. No ties. No hassle.

SUPPLIED WITH TERMINAL BLOCK

5x3-pole 32A approved lever connector blocks included as standard - conforms to EN 60598-1 (GWT 650°C), with push fit closing.

MAINTENANCE FREE

Comes complete with a butterfly clip that secures the lid for a fully compliant and maintenance free installation (PLUS a spare clip).

QUICK & EASY INSTALLATION

After inserting cables and closing the levers, the lid of the box is simply snapped shut and secured with the butterfly clip supplied. The Debox SL2 comes complete with everything you need in one kit for quick and easy installation. Debox SL2 gives you peace of mind that every installation is compliant and maintenance free.
